Black Mesa, New Mexico

May 5, 200-

Dr. Gordon Freeman
Visiting Fellow
Institute for Experimental Physics
University Of Innsbruck
Technikerstr. 25
A-6020 Innsbruck, Austria

Re: Offer of Employment

Dear Dr. Freeman:

We apologize for the delay in our correspondence.

This letter shall confirm a recent telephone conversation in which you were offered, and did accept, a position at the Black Mesa Research Facility. As discussed, you shall begin at Level 3 Research Associate status, assigned to the Anomalous Materials Laboratory. Our research team will be expecting your arrival in approximately **TWO WEEKS**.

Please note that as a necessary condition of you work with anomalous materials, you may be required to wear and operate an HEV hazardous environment suit. You will be trained and certified in its use during the standard orientation process. Your tenure will be limited to the Black Mesa Facility **ONLY**. You will **NOT** be cleared for off-site assignments. All further questions regarding the Black Mesa Research Facility and your role as Research Associate will be answered during orientation.

As you know, Dr. Kleiner, your former professor at the Massachusetts Institute of Technology, originally recommended you for contact by the Civilian Recruitment Division. He wishes to extend his congratulations on your decisions to accept our offer. Like Dr. Kleiner, we are confident that your career with the Black Mesa Research Facility will be a long and rewarding one.

Office of the Administrator
Civilian Recruitment Division
